(54) DEVICE AND METHOD FOR PRESENTATION AND INFORMATION RECORDING MEDIUM

(57)Abstract:

PROBLEM TO BE SOLVED: To enable an electronic document contained in a terminal brought by a participant in a conference, etc., to be read jointly by other participants or to be distributed freely to other terminals by simplifying the procedures for network configuration.

SOLUTION: A first presentation device 2 (terminal) and second presentation devices 3-5 (terminals), either one of which can be connected to a projector 1 (external display device), are configured so that both devices 2 and 3-5 may be connected to each by radio and, at the same time, links are configured between the terminals 2 and 3-5 by exchanging connection requesting messages and connection permitting messages between the terminals 2 and 3-5 so that information required for presentation may be exchanged between the terminals 2 and 3-5 through the links. Since the links between the terminals 2 and 3-5 can be configured automatically by exchanging the messages between the terminals 2 and 3-5, a network can be constituted without taking extra procedures.
